

COMPASSIONATE REVOLUTION

together we are irresistible...

Because deep down we all know the dominant system does not serve the majority; failing to provide even the basics of life for millions of people.

Because the current system threatens this beautiful miracle of life on Earth. We are heading for a planetary Fry-up. The Alarm bells are ringing.

Because a revolution without Compassion and without inner change, can lead back to a few, with power and control, dominating the many.

Because coming together in unity with others, sharing our voices and our vision, is the antidote to overwhelm, despair, and powerlessness.

We seek an inclusive world, where individuals are supported to express their unique gift and where we work together to support our community, to create beautiful things and to tackle the major problems of our age:

- A functioning democracy, where people have real agency in decisions,
- An economy designed to maximise happiness and minimise harm,
- Policies to promote equality, localised production, for reducing consumption, zero carbon and zero waste.

This won't happen without a **Compassionate Revolution**, meaning a loving, rapid change in wealth distribution and power structures.

You are already a **Compassionate Revolutionary**, by doing the work you love; by **Healing Harm** inner and outer, by **Resisting Harm**, by building **Way Better Ways** and by growing our **Collective Evolution**. Support the wider movement by aligning your energy with pledges of collective action.

Examples could include, I pledge to:

- Withhold council tax, if 3000 local people join me, to stop local fracking
- Rent strike with 100 others if my Housing Association sells off assets
- Withhold £1 of tax demanding Government tackles tax dodging & PFI
- Use an unsecured loan to pay for climate change projects (no repayment)
